D-Scope VIA Enterprise Imaging Management Software Adds Clinical Value and Expedites Workflow

Easily create and manage a highly secure and remotely accessible video imaging archive

Build a Dynamic Archive

- Capture, mark and store encounter-based endoscopic video using your existing scopes, cameras and light sources
- Mark, edit and archive existing videos
- Multi-tier archiving solutions using hardware and software

Enhance Patient Care

- Integrate video and patient data with your reports and EMR
- Live stream interactively with remote audiences
- Attach AI metadata for clinical performance studies
- 3-D modeling, automatic marking, and other capabilities

Improve Efficiency Across the Enterprise

- Unify video workflow across operating rooms, clinics and ASCs
- Reduce repetitive non-clinical tasks and staff time searching for relevant patient imaging files
- DICOM support to integrate endoscopic video and images with your Radiology PACS to implement a seamless media archive
- Connect 3rd Party medical devices and apps that improve workflow

Call D-Scope to learn more about how we can help you to more effectively manage the recording and archiving of encounter-based video and imaging workflow at your practice or across your Enterprise.

D-SCOPE® SYSTEMS VIA
Video Image Archive
